WORK EXPERIENCE

UFAZ WITH IATC COMPANY

20.03.2023 – 20.07.2023

BACK END(NODE.JS) DEVELOPER Course

- First I learned how websites work in the background
- Ability to work with Node.js, MYSQL, java Script at the same time
- At the end of the course, I improved my knowledge of API and Npm, at the end I received the highest level certificate (HONOR).

AZMIIB Organization

2023-2024

FRONT-END EXPERIENCE

- Learning how websites are developed
- Practicing my front end skills
- As a result, we were able to create a new interactive website for this organization

AZMIIB Organization

15.02.2024-30.06.2024

FRONT-END DEVELOPER

- We prepared the resume editing site together with the team
- We hosting this website with Cpanel online server and put it to global use
- I gained more knowledge about react by using react technologies on this site

"Support to the development of engineers"

2024-20.05.2024

University Experience: Front-end Developer

- We learned the basics of Next.js in an internship sent to this institution by the university
- We have developed projects with Redux and other popular React libraries
- These projects include StoreApp, WeatherApp, Rent-a-car website, etc.
- You can see more information about my projects on the My Portfolio webpage above
